**TEKNION EARNS THREE AWARDS INCLUDING BEST
OF SHOW AT IIDEX/NEOCON CANADA 2010**

*Conflux LED Lighting collection designed by Carl Gustav
Magnusson named Best of Show*

TORONTO, September 24, 2010 – Teknion Corporation today announced that two of its new products – the Conflux LED Light and Teknion Powermat Accessories Collection – received Innovation Awards at IIDEX/NeoCon Canada, which runs September 23-24 at The Direct Energy Centre in Toronto. In addition, Teknion’s booth received a Bronze Award in the 800-square-foot-plus category.

“The judges were very impressed with the innovative solutions and sustainable quality of the products at this year’s show. All of the winning products have been thoroughly researched and tested. They are certain to be winners in the marketplace,” said David Hanson, President, Interior Designers of Canada.

Conflux is a full scope of LED lighting products including versions for desk, table, floor, beneath overhead cabinets, and panel or wall mount. Conflux introduces innovative design and technology advancements to LED lighting. The result is a better quality of light – similar to daylight – with less shadow and glare. Conflux was also honored with a Best of NeoCon Gold Award in Chicago in June of this year.

Teknion Powermat Accessories – Monument, Edgemount, Personal Charger and Conflux Adjustable Task Light with Powermat base – deliver real-time, wireless charging to multiple electronic devices including iPods, iPhones, BlackBerry devices, mobile phones, GPS, handheld games and cameras.

Themed Design Does Matter, Teknion’s 1,200-square-foot booth was constructed with a 16-foot-high surround suspended off the floor. This floating wall created a unique enclosure, directing the visitor’s attention to various configurations of the District furniture system, while also creating an illusion of spaciousness as the floor extends visually past the wall-defined space. The all-white exterior symbolizes the designer’s blank white page where anything is possible, and the interior features blue-sky imagery to infer limitless imagination.

“Teknion is honored that this select group of judges celebrated the design excellence and technical innovation inherent in our Conflux LED Lighting and our Powermat Accessories collections with 2010 IIDEX/NeoCon Canada Innovation Awards,” says Frank Delfino,

Teknion President, World Markets. “In addition, this marks the seventh consecutive year that a Teknion exhibit created by Vanderbyl Design has received an award at the show.”

The Innovation Awards are run by the Interior Designers of Canada (IDC) and Merchandise Mart Properties (Canada) Inc., managers of IIDEX/NeoCon Canada, the country’s largest exposition and conference for the design, construction and management of the built environment. Twenty-six judges from the interior design and architecture community determined 59 winning products. IDC owns the annual fall design exposition.

Teknion Corporation is a leading international designer, manufacturer and marketer of office systems and related office furniture products. Teknion headquarters are located in Toronto, Ontario. The company has offices and facilities in Canada, the United States, the United Kingdom and the Pacific Rim, and serves clients through a network of authorized dealers worldwide.
